## Career Objective

Passionate and proactive Cloud & DevOps Engineer with hands-on experience in AWS, Azure, and Google Cloud Platform. Skilled in designing scalable, secure, and cost-effective cloud solutions. Strong background in CI/CD, container orchestration (Docker, Kubernetes), and infrastructure as code (Terraform, Ansible). Focused on solving infrastructure challenges, streamlining deployments, and building resilient systems.

## Education

Bachelor of Computer Applications (BCA), Savitribai Phule Pune University | 2022 – 2025

AWS Cloud Computing Training, AWS Skill Builder | 2025

DevOps & Cloud Course, CloudThat | Ongoing

## Certifications

AWS Cloud Practitioner Training – AWS Education
Covers: Cloud concepts, core AWS services, security, pricing, support

## Technical Skills

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda, RDS, CloudWatch, Route 53, ELB), Azure (VMs, Blob Storage, Azure AD, App Services, AKS), GCP (Compute Engine, Cloud Storage, IAM, Cloud Run, BigQuery)

DevOps & CI/CD: GitHub Actions, Jenkins, GitLab CI, Azure DevOps; Git, GitHub, Bitbucket

Containers & Orchestration: Docker, Podman, Kubernetes (EKS, AKS, GKE), Helm

Infrastructure as Code (IaC): Terraform, AWS CloudFormation, ARM Templates, Pulumi

Configuration Management: Ansible, Chef, Puppet

Monitoring & Logging: Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor

Security: IAM, SSL/TLS, RBAC, HashiCorp Vault, AWS Secrets Manager

Networking: VPC, Subnets, NAT Gateways, Load Balancers, DNS, VPNs

Scripting & Automation: Python, Bash, PowerShell | Cron Jobs, Shell Scripts, Cloud SDKs/CLIs

Build & Artifact Management: Maven, Gradle, Nexus, Artifactory, Docker Hub

Testing & Quality: Unit Testing (PyTest, JUnit), SonarQube

Other: Agile/Scrum, Disaster Recovery, Cost Optimization, Documentation

## Projects

Personal Portfolio Website 🔗
Designed and developed a full-stack portfolio using Python, Linux, and cloud platforms (AWS, Azure). Demonstrates skills in web development and creative design.

Movie Booking Website 🔗
Built a complete online movie booking system with user authentication, movie listings, and seat selection.

AWS Project – Full End-to-End Web App 🔗
Deployed a full-stack application on AWS with CI/CD and high availability architecture.

AWS Serverless Contact Form 🔗
Implemented a contact form using Lambda, SES, and Google reCAPTCHA, demonstrating serverless deployment and secure messaging. GitHub:
